ABOUT ME

I have five years of experience as a software developer specializing in front-end development using React and Next JS. I've been involved in various projects developing web platforms for large clients. I've helped improve and complete ongoing projects that needed a boost. And I have been learning and growing since then.

PROFESSIONAL EXPERIENCE

NTT Data - Europe and Latam.   **Zaragoza, Spain**
Senior Engineer, Frontend Developer   October 2024 - Present

- One of the main front-end developers, I helped define the code structure and testing strategy. I worked on a SaaS project involving data management and real-time device tracking. I worked with Next.js, React Query, Tailwind, and Jest for unit and integration testing.
- Help build a responsive web app to scan QR codes and send data from those codes for later analysis.

Avanade Spain   **Barcelona, Spain**
Analyst, Frontend Developer   October 2022 - October 2024

- I developed a web platform with React connected to SharePoint for a hotel company to display information, news, and access company information, documents, and staff.
- Collaborated on a web banking project for a large Spanish client, developing front-end developments with Angular.
- Managed various projects, creating and overseeing tasks alongside teams using the SCRUM methodology.
- Managed code with Git and Git Flow using Azure DevOps.

Trendico Group   **Zaragoza, Spain**
Desarrollador Web   January 2021 - October 2022

- Development of an intern web app in REACT connected to a database, managing users and access permissions. Built with MongoDB, Express, React, and Node JS.
- Maintenance and redesign of an e-commerce site built with PHP to improve the current design to a more modern and responsive design with improved UI/UX.
